

The School of Theatrical Dance

Dear Friend,

Incorporated in 1980, we have been working tirelessly ever since to bring quality dance instruction and personal attention to each and every one of our students.

Our professional and educational background uniquely qualifies us to discover, challenge and nurture not only the dancer, but also the emerging individual.

We recognize that everyone has something to offer to, and gain from, the dance class whether their goal is to become a dancer, a writer, a scientist, a mathematician, or whatever they dream of being.

Our program is dedicated to teaching correct technique and artistry. And there is much more to that process than meets the eye - From teaching them anatomy to music theory, French to physics, history of dance and how it reflects society, and more.

We help our students develop strength of mind and body, a connection with and sense of support and appreciation of their fellow dancers. We provide two opportunities a year to bring it all together in a professional theatrical setting. These events offer a platform where they not only exhibit their dance accomplishments, but also learn organizational skills and teamwork - Skills that follow them throughout their lives.

Please consider your tax-deductible gift in support of our mission ... A mission of encouraging our students to become conscientious citizens as well as true artists.
